Quality Policy

The policy of Sylatech Ltd is to work within the framework of AS9100/BS EN ISO 9001 whilst meeting our interested parties' needs, and to continually improve the effectiveness of the Quality Management System.

Quality objectives have been established and will be reviewed for continuing suitability at management reviews. The Quality Policy will be communicated within the organisation by posting on notice boards, and also at an effective induction procedure for new employees. Every employee will sign a document to confirm that they have understood the Quality Policy, and are aware of and are prepared to work to the stated Quality Policy.

"It is our responsibility for every product or service which we provide, that we identify and conform to the detailed requirements of our customers, delivering on time, in full and to the required specification".

Charlie Breese,

Chief Executive Officer,
Sylatech Ltd.
